

About ROECYBERSECURITY

My name is **Marate Daniel Agninde**, and I am the **Chief Executive Officer of ROE Cybersecurity**. I am honored to bring a wealth of experience and a strong professional background to the forefront of digital security innovation.

I hold a **Bachelor's degree in Computer Information Systems (CIS) pursuing my master's degree**, with a concentration in **Cybersecurity**. My academic foundation is supported by professional certifications, **including CompTIA Security+ and CompTIA CySA+**, which validate my expertise in securing digital infrastructures and managing cybersecurity threats effectively.

In addition to my technical qualifications, I am the author of a beginner-focused cybersecurity book, aimed at empowering individuals and organizations with fundamental knowledge in this critical field. My commitment to education and awareness reflects my broader mission to promote cybersecurity literacy at all levels.

I am also a **proud U.S. Army veteran**, having honorably served and retired as supervisor and leader. My military background has instilled in me a strong sense of discipline, leadership, and a strategic approach to security. I currently hold a SECRET-level security clearance, which underscores my trustworthiness and experience in handling sensitive information.

As the founder and owner of the ROE laptop brand, I design and develop custom-built laptops specifically engineered for digital security. These devices are tailored for cybersecurity professionals, ethical hackers, and privacy-conscious users, reflecting my passion for creating tools that protect digital integrity.

Through ROE Cybersecurity, I am committed to advancing the future of secure technology and helping organizations safeguard their digital assets in an increasingly complex threat landscape.
